

Blackhawk dealers sell more sets

—make more profits—
than any other
socket wrench dealers

—because we are the largest manufacturers
of socket wrenches in the world, and our
dealers sell and profit accordingly.

No other sets are so easy to sell because
Blackhawk advantages are outstanding.
Blackhawk sockets are guaranteed to never
wear out, round out or break. Sockets and
handles are made of special analysis steel,
amazingly tough; sockets fit the nuts exactly,
and handles have just the right reach and
leverage. The finish is satin black, baked on.
